H&R is about the guest and home owner experience. We are well versed in translating the visions of the architect and working with innovative materials to achieve dramatic and memorable effects that deliver five star quality on every project. Understanding the rhythm of repetitive fit-outs and deliverables is also key. We rely on our extensive pre-planning and mock-up skills to get it right from the start and follow through with focused attention being paid to quality control and sustainability.

W SOUTH BEACH

Miami Beach, Florida

Plaza was selected to oversee construction on the latest addition to the portfolio of The W Hotel Group, renowned for its lavish hotels around the world, in a prime location on 23rd Street and Collins Avenue in Miami Beach. An upscale hotel-condominium with 408 units, the W South Beach was designed by the internationally recognized architectural firm Costas Kondylis & Partners.

CANYON RANCH LIVING: CARILLON II

Miami Beach, Florida

The touchstone of this project is Miami's historic Carillon Hotel. Once the epitome of 1950s glamour, the South Florida landmark had fallen into disrepair and stood empty for more than 10 years. The owner undertook to restore, convert and expand the Carillon into a new Canyon Ranch location, consisting of a condominium community, hotel and spa, all embodying "Canyon Ranch living." Plaza was selected to manage construction on the property's 36-story, 207-unit luxury condominium tower.

SUPERIOR INK

New York, New York

Located in New York City's famed West Village on the site of a historic factory by the same name, Superior Ink is a luxury condominium tower and seven distinct low-rise townhouses. The 17-story, LEED Silver tower includes 62 apartments facing the Hudson River, while the townhouses line picturesque Bethune Street.

"From initial preliminary pricing to now, as we near completion, I have found Plaza's workmanship to be of the highest professional quality. Despite multiple client-initiated changes, Plaza has worked diligently to keep the project on schedule and to control costs. I have been impressed with their thorough under-standing of the project's technical and design requirements, and their willingness to go beyond the call of duty when necessary."

- Alexis R. Roworth, RA, LEED AP,
